Medication

If medication is required for a child, a **medication form** must be filled in and signed by an educator and caregiver. The medication must be given to an educator for storage, and not kept in the child's bag. Prescription medication can only be administered with written permission by the caregiver. The medication must be in its original container, in date and labelled with the pharmacy label (including the child's full name and dosage, method and time/s to be administered).

For children with **anaphylaxis, allergies, asthma or diabetes**, the child must have their action plan and medication/s either already stored at the service or with them on the day/s they are attending. If a child does not have their required medication, they will not be allowed to attend.
